Company Profile

Jennifer Technology Sealing

Jennifer Technology Hengshui Co., Ltd with 15 years of experience in rubber oil seal production, is a professional manufacturer and industry leader integrating r&d, production and sales of all kinds of skeleton oil seal, O-ring , rubber gasket, pump and valve oil seal and oil seal cover. Since its establishment, Zipai rubber & Plastic Co., Ltd. has been paying attention to the high level of quality control and process management to ensure that our products are of good quality and excellent price. Our quality control team checks and tests each piece of rubber product before shipment to ensure complete customer satisfaction. In addition, we have a strong sales team that can provide sales and field service whenever required. Our customer service team is ready to help you in any way.

The company has passed iso9001:2008 quality management system certification and ROHS certification, and has established long-term business relations with overseas countries and regions. Oil seals, O rings, rubber gaskets and other products are exported to Europe, America, Australia, Russia, Canada and other countries and regions. If you have any requirement or interest in rubber seal, O-ring seal, pump valve oil seal, please feel free to contact us. We also welcome OEM and ODM orders. Our team will ensure that our high quality products and best service are your first choice and preferred supplier in China.

Process and product introduction

*O-ring,O-ring kit , auto parts seal , pneumatic seal ,
connector seal , electronic seal , aerospace seal , new energy ,
customized seal...*

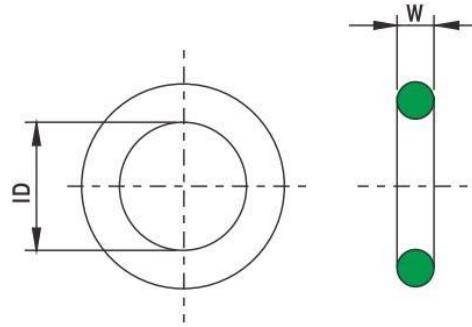

Flow chart of production process

O ring

O ring

- O- ring is a kind of rubber ring with a circular cross- section. Because its cross- section is O- shaped, it is called an O- ring.

Application

- O- rings are the most widely used seals and the most commonly used in hydraulic and pneumatic transmission systems.

Material

- HNBR CR NBR VMQ
- EPDM PU FKM SBR

Car air conditioner o-ring kit

18 grids

- 18 grids o-ring kit ,including 8 sizes of American Standard (AS) O-rings, mainly made of nitrile rubber (NBR) and hydrogenated nitrile (HNBR)

Big , small 18 grids

- 8 grids o-ring kit, including 8 sizes of America Standard (AS 568) O-rings, big and small is different in the quantity of O- rings

Customized kit

- Except for standard kits, our factory can also make kit according to customer's requirements.

Auto Seals

Auto Seals

- Mainly focus on hydraulic and air valve seal, mainly used for decoupling, clutch and braking system.

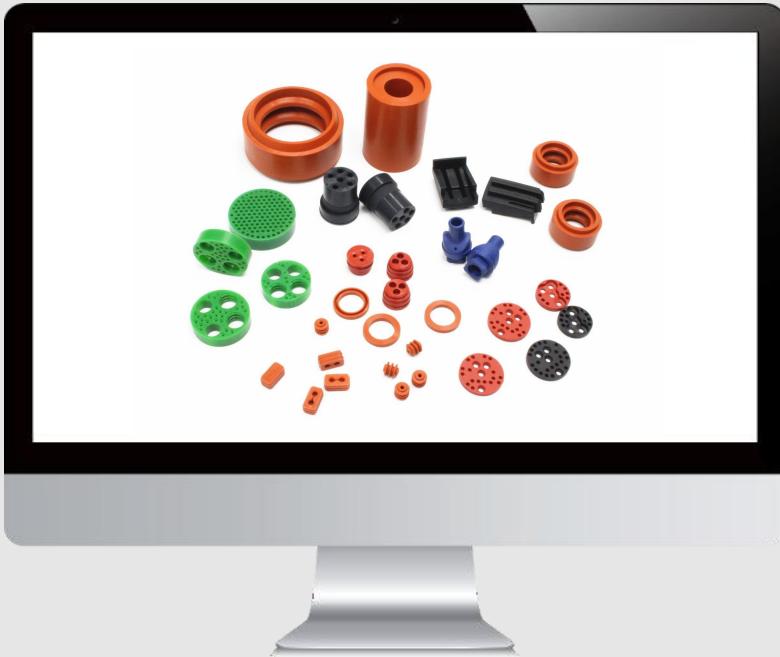

Pneumatic Seals

Pneumatic Seals

- It mainly includes Y-shaped seal, metal seal, and pneumatic components. It is characterized by the use of compressing air to seal the gap of the rotating shaft, and prevent the leakage of the working medium.

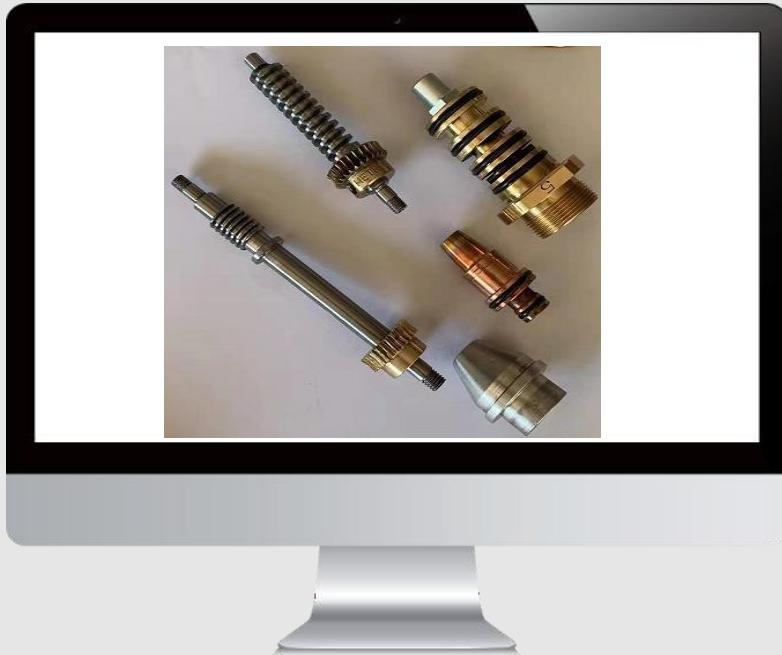

Connector Seals

▶ Connector Seals

- Mainly focus on RF, high-speed and high-density connectors, sensor seal, frequency seal.

Aerospace Seals

Aerospace seal

- High pressure resistant, wear-resistant, corrosion-resistant seal

New energy Seals

➤ New energy vehicle seal

- Charging pile and charging gun series.

Seal Washer

• Seal Washer

- Seal washers are designed to withstand extreme pressure and to form a complete seal along the threading of your bolt.

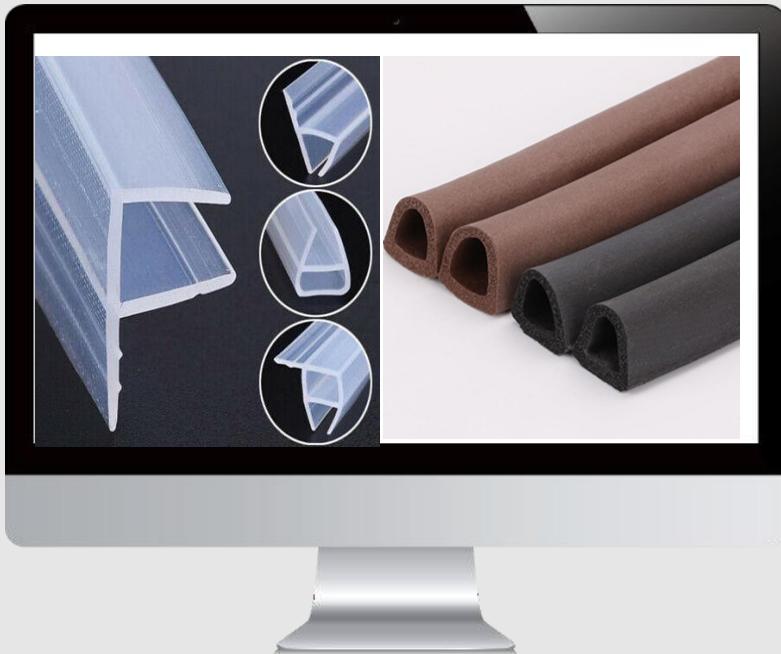

Seal gasket

- Seal gasket

- Gaskets and seals are used across diverse applications such as automotive, aerospace, electronics, and manufacturing among others. They operate at various temperatures by addressing mechanical stress and vibration damping.

Silica gel sealing strip

New energy vehicle seal

- Sealing strips are used in a wide variety of applications, within construction and industry, for sealing, dampening, or protecting

Bearing

► New energy vehicle seal

- A wide range of agricultural, radial, mounted unit ball bearings, and tapered roller bearings
- Valued bearing solutions for agricultural, electrical, fluid, HVAC, industrial transmission, material handling, and off-highway

OEM Products

Material Features

Among them, there are many kinds of fluororubber (FKM), the most famous of which is VITON of DuPont. Its grade GF200 and ETP are often used in the new energy industry. In addition, our company also uses perfluoroether rubber (FFKM), hydrogenated nitrile rubber (HNBR), acrylate rubber (ACM), neoprene rubber (CR), polyurethane (PU), etc.

01. NBR

- It's commonly used in seals, oil-resistant seals are mainly made of nitrile rubber (NBR).

02. NR

- It has good comprehensive mechanical properties. Natural rubber (NR) is not resistant to mineral oil, but it is more stable in vegetable oils and alcohols.

03. SIL

- It is colorless, odorless and non-toxic, with excellent high temperature and low temperature resistance, and the operating temperature range is -60~200°C. And it has excellent weather resistance and insulation properties.

04. FKM

- It is non-spontaneous, non-combustible, and with self-extinguishing in fire, with good physical and mechanical properties, it has the best comprehensive performance among all synthetic rubbers.

05. EPDM

- Resistant to heat, light, oxygen and especially ozone. Resistant to polar solutions and chemicals, low water absorption, good insulating properties

06. FVMQ

- Superior high and low temperature resistance, superior compression set, it's clean, low odor, tasteless.

Market analysis

Domestic market. foreign market

Foreign market

Strength and confidence are essential qualities of a excellent team. We will eventually take strength as the spear and self-confidence as the shield, have courage, and unite as one to overcome all difficulties. Everyone will be full of confidence and prove themselves with strength.

Domestic market

► Domestic market (Prove with actions, defend with quality.)

Domestic market

- Guangdong, Hebei ,Sichuan , Fujian,
- Guizhou ,Jiangsu ,Zhejiang , Jiangxi, Anhui,Hubei ..

Execution plan

Other plans

Other plans

01 strengthen training

02 Strengthen enterprise management

03 Improve service

04 cost control

Invite Jianfeng Enterprise Management to train, enhance the internal management of the company. For better development.

Strengthen the training of company, strive to improve the profession, culture and skill of employees, to improve service and risk awareness of them. To cultivate the market awareness and management ability of middle-level cadres, and develop a talent team to meet the needs of enterprise.

Make service copywriting for customers. and to attract more customers by high-quality service,

Make cost accounting, and analyze the investment of network resources, personnel expenses, and charges, so as to control the input-output ratio.

Strategic target

➤ Integrity

With the aim of win-win, cooperate sincerely, and achieve mutual development.

➤ Efficiency

Improve efficiency constantly, and focus on methods and techniques in everything.

➤ Innovation

Indigenous innovation in key areas, in support of current and future development

➤ Quality

Aim for zero defect and exceed customer's expectations.
